Summary

A fast learner software developer that believes with our current world and the fast pace we are advancing, adapting and learning new skills is essential but exciting. **<u>Interests</u>**: **Microservices, Cloud, Distributing Systems, ML/AI, DevOps**. Proficient in **Typescript, Python.**

EDUCATION

Texas A&M University
B.S. Computer Science,   **December 2021**
Concentration: Software Engineering GPA: 3.42

Technical Skills

Languages: Javascript/Typescript, Python, C#

Frameworks/Technologies: .NET, React, Azure, AzureDevOps, Github Actions, Kubernetes, Docker Unix/Linux, Git, React-Native, AWS

PROJECTS AND EXPERIENCE

Software Engineer,   *Microsoft, Houston, TX (Remote).*   **January 2022 - Present**
Azure Portal Team Developer

- Designed, developed, and maintained highly scalable features that allows many azure services teams to contribute UX in an easier manner to Azure's central application.

- Designed, developed and maintained build and devops systems that increased dramatically the efficiency, scalability, and quality of CI/CD flows of projects development

- tools: **React, Typescript C#, .NET, Azure, Azure Devops.**

Software Engineering Intern,   *Microsoft, Redmond WA.*   **Summer 2021**
Azure Portal Team Developer

- Designed, developed and maintained migrations features and experience of Azure Portal Interface from a legacy Javascript framework environment to a React.js Environment

- Designed, developed and maintained certain UX experiences in Azure's central application.

- tools: **React.js, Javascript, Typescript, Azure.**

Software Engineering Intern,   *JP Morgan & Chase Co., Plano Tx.*   **Summer 2020**

JPMorgan Chase & Co.

- Developed Social Media management app features to feed and visualize information and analytics from different social media platforms, using **React,** integrated with Backend REST-API.

- tools: **React, Bootstrap, Typescript.**

Software Developer Intern,   *Momentum Enterprises, Irving Tx.*   **Summer 2019**

- Created a 3 stage data recovery system software tool used to migrate and back up 60 TB worth of data of main system as archives into **AWS** cloud, through the use of some **AWS** services

- tools: **Python, AWS, AWS Snowball, AWS S3.**

Other Projects
- **CI-CD Project Flask App, (Flask, Docker, Kubernetes, Azure)**
- **React Native Fitness Form tracking mobile app (React-Native)**
